FOR IMMEDIATE RELEASE:

XPERTECHS summoned by The Ruckdeschel Law Firm for new network design and configuration

Ellicott City, Maryland – August, 2007 – XPERTECHS, a leading Network Engineering and IP Telephony Solutions Partner, announced that it has been selected by The Ruckdeschel Law Firm, LLC to implement and install a new server and network infrastructure. The Ruckdeschel Law Firm has been committed to serving their clients and has already experienced great legal success. This solution proposed by XPERTECHS gives The Ruckdeschel Law Firm the capability to grow their data storage requirements while providing redundancy and security.

According to Erin O’Keefe of The Ruckdeschel Law Firm, “The pre-planning and timing of this project was critical. We could not afford to have any *down-time* during our normal work schedule. Xpertechs launched an after-hours effort that was both efficient and accurate so that our system was operational each morning.”

The implementation of the new server and the upgrade to Microsoft SBS 2003 was completed the first night. The second evening allowed Xpertechs to complete the migration of the data from the four old servers to the new server and work on end-user PC issues and printing. The third night involved moving the business application and data without incident.

“XPERTECHS is very excited about the relationship with The Ruckdeschel Law Firm. Our expertise enables us to access a situation quickly and provide rapid response time to meet the individual needs of our clients. Our ability to quickly adapt to resource requirements, scheduling and availability of products allowed us to perform without hesitation,” said Michael Mellott, President at XPERTECHS.

About XPERTECHS

XPERTECHS is a leading Convergent Technology company offering a full range of services including Microsoft and Novell solutions, LAN and WAN connectivity, Managed Care, Computer Telephony Integration, IP Telephony, Internet Connectivity, and Training.
